

will this code work?

```
int main(int argc, char** argv)
{
    // lambda function
    auto f = []()
    {
        std::cout << "ID of this thread = " <<std::this_thread::get_id() << std::endl;
    };

    scoped_thread th(std::thread{f});

    return 0;
}
```
